**NEW QUESTION: 2** In which of the following scenarios would a tester perform a Kerberoasting attack?**A.** The tester has compromised a limited-privilege user and needs to target other accounts for lateral movement.**B.** The tester needs to retrieve the SAM database and crack the password hashes.**C.** The tester has compromised an account and needs to dump hashes and plaintext passwords from the system.**D.** The tester has compromised a Windows device and dumps the LSA secrets.**Answer: A**

**NEW QUESTION: 3** Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Your company has an Office 365 subscription. Users at the company use Microsoft Skype for Business to send instant messages to internal users, external partners, and users on the consumer version of Skype. You discover that the Skype for Business users fail to communicate with users on Google Hangout. You need to ensure that the Skype for Business users can send instant messages to the Google Hangout users. Solution: You run the Set-CsExternalAccessPolicy-identity FederationAndPICDefault- EnablePublicCloudAccess \$true command. Does this meet the goal?**A.** Yes **B.** No **Answer: A** Explanation: The net result: all external access policies that allow public cloud access will also allow federation access. The EnablePublicCloudAccess parameter indicates whether the user is allowed to communicate with people who have SIP accounts with a public Internet connectivity provider such as MSN. The default value is False. References: <https://technet.microsoft.com/en-us/library/gg398916.aspx>
