It is crucial that you have formed a correct review method, Try Marketing-Cloud-Advanced-Cross-Channel dumps to ensure your success in exam with money back guarantee, You can tell according to updating version NO.

Now, we know time and energy are very precious for all of you, The reasons why our Marketing-Cloud-Advanced-Cross-Channel test guide' passing rate is so high are varied, It will help you to prepare better for the final Marketing-Cloud-Advanced-Cross-Channel exam.

With the high pass rate of our Marketing-Cloud-Advanced-Cross-Channel practice braindumps as 98% to 100%, i can say that your success is guaranteed, Photoexperienceacademy were established for many years, we Cheap Marketing-Cloud-Advanced-Cross-Channel Dumps have professional education department, IT department and service department: 1.

NEW QUESTION: 1 Universal Containers (UC) uses a custom object to track expense reports. UC wants to automatically post updates on a record's feed whenever an expense report has been approved Which social feature can be used to accomplish this? **A.** Feed tracking **B.** Auto-response rule **C.** Approval process **D.** Feed Quick action **Answer: A**

NEW QUESTION: 2 A company uses Skype for Business Online. You use contoso.com as the verified domain name for the Office 365 tenant. Users conduct Skype online meetings. You add

fabricam.com to the tenant and configure the tenant to use this domain name. You need to ensure that all Skype online meeting URLs contain the new domain name. Which Windows PowerShell cmdlet should you run?

A. New-CsSimpleUrl
B. Update-CsTenantMeetingUrl
C. Set-CsUser
D. Set-CsMeetingRoom
E. Set-CsMeetingConfiguration

Answer: A

Explanation/Reference: Explanation: The New-CsSimpleUrl command Creates a new simple URL, which can then be added to a simple URL configuration collection. Simple URLs make it easier for users to join meetings and conferences, and also make it easier for administrators to log on to the Skype for Business Server Control Panel. Example: The example shows how a new URL can be added to an existing collection of simple URLs. To begin with, the first command in the example uses the New-CsSimpleUrlEntry cmdlet to create a URL entry that points to https://meet.fabrikam.com; this URL entry is stored in a variable named \$urlEntry. In the second command, the New-CsSimpleUrl cmdlet is used to create an in-memory-only instance of a simple URL. In this example, the URL Component is set to Meet; the domain is set to fabrikam.com; the ActiveUrl is set to https://meet.fabrikam.com; and the SimpleUrl property is set to \$urlEntry, with \$urlEntry being the URL entry created in the first command. After the URL has been created (and stored in the object reference \$simpleUrl) the final command in the example adds the new URL to the simple URL collection for the Redmond site. This is done by using the Set-CsSimpleUrlConfiguration cmdlet, the SimpleUrl parameter, and the parameter value @{Add=\$simpleUrl}. This syntax causes the URL stored in the object reference \$simpleUrl to be added to the SimpleUrl property.

```
$urlEntry = New-CsSimpleUrlEntry -Url "https://meet.fabrikam.com" $simpleUrl = New-CsSimpleUrl -Component "meet" -Domain "fabrikam.com" -SimpleUrlEntry $urlEntry -ActiveUrl "https://meet.fabrikam.com" Set-CsSimpleUrlConfiguration -Identity "site:Redmond" -SimpleUrl @{Add=$simpleUrl}
```

Incorrect Answers: A: The Update-CsTenantMeetingUrl command updates the meeting URL for the specified Lync Online tenant. The updated URL uses a simpler, more standardized format that makes it easier for clients to locate and connect to meetings. References: https://technet.microsoft.com/en-us/library/gg398180.aspx

NEW QUESTION: 3 A customer network engineer has made configuration changes that have resulted in some loss of connectivity. You have been called in to evaluate a switch network and suggest resolutions to the problems. Refer to the topology. SW1 Switch Management IP address is not pingable from SW4. What could be the issue?

A. Management VLAN not allowed in the trunk link between SW2 and SW4
B. Management VLAN interface is shutdown on SW4
C. Management VLAN not allowed in the trunk links between SW1 and SW2
D. Management VLAN not allowed in the trunk links between SW1 and SW4
E. Management VLAN ip address on SW4 is configured in wrong subnet

Answer: E

Explanation: In the network, VLAN 300 is called the Management VLAN. Based on the configurations shown below, SW1 has VLAN 300 configured with the IP address of 192.168.10.1/24, while on SW4 VLAN 300 has an IP address of 192.168.100.4/24, which is not in the same subnet.
