NEW QUESTION: 3
オフィスのスタッフがメールを正常にテストできることを確認する必要があります。あなたは何をするべきか？**A.** 環境をExchangeのOrgIDとして追加します。**B.**
QA環境を同期インスタンスとして追加します。**C.** QA環境の同期インスタンスを変更します。**D.**
QA環境で同期方法を変更する**Answer: C**Explanation:Explanation* An office staff member tests emails, but the email is not sent.* Mailboxes are set to synchronize with Microsoft Exchange in the Production instance.We need to configure the QA environment as the synchronizing instance.Topic 1, Case Study 2 Lamna Healthcare ClinicBackgroundLamna Healthcare is a local medical clinic comprised of doctors, nurses, and office staff. The company is implementing Dynamics 365 for Sales.Current environmentEnvironments* The company has the following environments: Sandbox, QA, and Production.* All environments use one custom app in the Unified Interface.* There is one solution in the Sandbox environment containing modifications to the Patient and Invoice forms.* A security group has been created for each environment.You configure the system as follows:* Duplicate detection is not set for the Patient entity.* The currency field for Service Fee is set to two decimal places.* Mailboxes are set to synchronize with Microsoft Exchange in the Production instance.Testing and customization* All changes are first created in the Sandbox environment and then imported into the QA environment for testing.* Testers only have access to the QA environment where testing occurs.* Doctors and nurses enter patient, billing, diagnostic, and other information directly.Security rolesThere are

two custom security roles; one for doctors and nurses, and another for the support staff.Data import* You import records for all current patients and past patients for the last five years.* A static worksheet of the patient records was exported after data import for validation. All records have been updated since that time.RequirementsFunctional* Ensure changes can be quickly made to customizations in the Production environment.* Provide all staff members access to a list of patients with the flue.* Provide doctors the ability to add medications related to a patient without navigating away from the patient's record. Medications must be stored against a custom entity named Medication.* Provide doctors, nurses, and office staff default navigation schemes based on their roles.User interface* Populate the custom field Follow-up Date with a date seven days from the visit date if a custom Follow-up checkbox is selected. Display the Visit Date field on the Visit form. Do not display the Follow-up Date field.* Display values in the Service Fee field as whole dollars.* The Status field on the Patient form contains historical data that must be retained.IssuesYou observe the following issues:* For some imported patient records, the doctor's name in the Current Doctor field is not spelled correctly.* A nurse uses the search on the All Patients view and cannot find a patient who left the clinic last year.* During testing, a nurse discovers a redundant field on the patient record.* An office staff member tests emails, but the email is not sent.* The modification to the Patient form needs to be tested immediately, but the Invoice form modification needs to be tested the following week.* A new user account for a doctor has been created in Office 365. The user account for the doctor must be available only in the QA environment.* A change in process has caused a Status field to be unnecessary to display on the Patient form.
