Explanation:A statement of cash flows provides information about the cash receipts and cash payments of an enterprise during a period. This information helps investors, creditors, and other users to assess the enterprise's ability to generate cash and cash equivalents and the needs of the enterprise to use those cash flows. Historical cash flow data indicate the amount, timing, and certainty of future cash flows. It is also a means of verifying past cash flow assessments and of determining the relationship between profits and net cash flows and the effects of changing price.

Explanation:To enable access to a compute node port, you enable the appropriate security rule. When you enable one of the predefined security rules, the given port on the compute node is opened to the public internet. To enable access to a different port, or restrict access to a port, you must create a security rule. Note: When a database deployment is created, the following Oracle Compute Cloud Service security rules are created, but set to a disabled status. ora\_p2\_dbconsole, which controls access to port 1158, the port used by Enterprise Manager 11g Database Control. ora\_p2\_dbexpress, which controls access to port 5500, the port used by Enterprise Manager Database Express 12c. ora\_p2\_dblistener, which controls access to the port used by SQL\*Net. ora\_p2\_http, which controls access to port 80, the port used for HTTP connections. ora\_p2\_https, which controls access to port 443, the port used for HTTPS connections, including Oracle REST Data Services, Oracle Application Express, and Oracle DBaaS Monitor.
