Explanation: You need to ensure that User1 can access the shares on Computer1, from network. If not from network, where would you access a shared folder from? from Mars? from Space? from toilet? Moreover, this question has explicitly state User1 is a member of Group3, and hence it is not possible for User1 to logon Computer1 locally to touch those shared folders on NTFS file system. Only these two policies to be considered "Access this computer from network", "Deny access to this computer from network". There's no option to modify the group membership of "Group2", "Administrators", or "Backup Operators", so we have to add a 4th entry "User1" to this policy setting "Access this computer from network".
