What should you do? **A.** From Event Viewer on each domain controller, create a subscription. **B.** From Event Viewer on each domain controller, run the Create Basic Task Wizard. **C.** From Event Viewer on the member server, create a subscription. **D.** From Event Viewer on the member server, run the Create Basic Task Wizard. **Answer: D**

NEW QUESTION: 2A Machine Learning Specialist is working with a large company to leverage machine learning within its products. The company wants to group its customers into categories based on which customers will and will not churn within the next 6 months. The company has labeled the data available to the Specialist. Which machine learning model type should the Specialist use to accomplish this task? **A.** Clustering **B.** Reinforcement learning **C.** Classification **D.** Linear regression **Answer: C** **Explanation:** The goal of classification is to determine to which class or category a data point (customer in our case) belongs to. For classification problems, data scientists would use historical data with predefined target variables AKA labels (churner/non-churner) - answers that need to be predicted - to train an algorithm. With classification, businesses can answer the following questions: * Will this customer churn or not? * Will a customer renew their subscription? * Will a user downgrade a pricing plan? * Are there any signs of unusual customer behavior?
