SMTPサーバーを使用してEメールを送信するようにDelivery APIを更新してください。

解決策は目標を満たしていますか？**A.** いいえ**B.** はい**Answer: A**  
Explanation: Explanation Use a custom outbound Azure API Management policy. Scenario: If a vendor is nearing the number of calls or bandwidth limit, the API must trigger email notifications to the vendor. (API usage must not exceed 5,000 calls and 50,000 kilobytes of bandwidth per hour per vendor.) References: <https://docs.microsoft.com/en-us/azure/api-management/api-management-howto-policies>

**NEW QUESTION: 2** **A.** Option **D**. Option **A**. Option **C**. Option **B**  
**Answer: D**  
Explanation: When a zone that this DNS server hosts is a stub zone, this DNS server is a source only for information about the authoritative name servers for this zone. The zone at this server must be obtained from another DNS server that hosts the zone. This DNS server must have network access to the remote DNS server to copy the authoritative name server information about the zone. A stub zone will forward and refer requests only for the key resource records that identify the authoritative servers for the zone. Thus a stub zone can be used to prevent Server1 to try and resolve Internet host names. Stub zones are used to improve name resolution so that the DNS server will perform recursion using the stub zone's list of name server without querying the Internet or even an internal root server.

**NEW QUESTION: 3** Which of the following BEST confirms the existence and operating effectiveness of information systems controls?

**B.** Management review and sign-off on system documentation  
**C.** First-hand direct observation of the controls in operation  
**D.** Self-assessment questionnaires completed by management  
**Answer: C**
