Therefore, you will have more time to prepare for the D-DP-FN-23 actual exam, Every page is full of well-turned words for your reference related wholly with the real exam.

Our D-DP-FN-23 real dumps help you pass real test and get the certification, So if you choose our D-DP-FN-23 learning quiz, you will pass for sure, Our materials will meet all of the IT certifications.

NEW QUESTION: 1 Examine the contents of SQL loader control file: Which three statements are true regarding the SQL*Loader operation performed using the control file? (Choose three.)
A. Field names should be the first line in the both the SQL*Loader data files.
B. An EMP table is created if a table does not exist. Otherwise, if the EMP table is appended with the loaded data.
C. The SQL*Loader operation assumes that the file must be a stream record format file with the normal carriage return string as the record terminator.
D. The SQL*Loader operation fails because no record terminators are specified.
E. The SQL*Loader data file myfile1.dat has the column names for the EMP table.
Answer: B,C,E
Explanation:
Explanation A: The APPEND keyword tells SQL*Loader to preserve any preexisting data in the table. Other options allow you to delete preexisting data, or to fail with an error if the table is not empty to begin with.
B (not D): Note: * SQL*Loader-00210: first data file is empty, cannot process the FIELD NAMES record Cause: The data file listed in the next message was empty. Therefore, the FIELD NAMES FIRST FILE directive could not be processed. Action: Check the listed data file and fix it. Then retry the operation
E: * A comma-separated values (CSV) (also sometimes called character-separated values, because the separator character does not have to be a comma) file stores tabular data (numbers and text) in plain-text form. Plain text means that the file is a sequence of characters, with no data that has to be interpreted instead, as binary numbers. A CSV file consists of any number of records, separated by line breaks of some kind; each record consists of fields, separated by some other character or string, most commonly a literal comma or tab. Usually, all records have an identical sequence of fields. * Fields with embedded commas must be quoted. Example: 1997,Ford,E350,"Super, luxurious truck"
Note: * SQL*Loader is a bulk loader utility used for moving data from external files into the Oracle database.

NEW QUESTION: 2 Which two actions protect a resource file from direct HTTP access within a web application? (Choose two)
A. placing it in the /META-INF/secure directory
B. creating a <web-resource> element within the deployment descriptor
C. placing it in the /secure directory
D. placing it in the /WEB-INF directory
E. creating a <secure-resource> element within the deployment descriptor
Answer: A,D

NEW QUESTION: 3 When Cisco Extension Mobility is implemented, how is the audio source for the MOH selected?
A. The audio source that is configured at the physical phone used for the Cisco Extension Mobility login is selected.
B. The audio source that is configured at the home phone of the user is selected.
C. The audio source that is configured at the user device profile is selected.
D. The audio source that is configured in the IP Voice Media Streaming parameters is selected.
Answer: C
Explanation: Incorrect answer: BCD To specify the audio source that plays when a user initiates a hold action, choose an audio source from the User Hold MOH Audio Source drop-down list box from device profile configuration settings. Link:

http://cisco.biz/en/US/docs/voice_ip_comm/cucmbe/admin/8_6_1/ccmcfgr/b06dvprf.html
