It is available for reading on-line and printing **Exam C-LCNC-2406 Papers** out for practice, You do not worry that our products are not the latest version, We created the greatest C-LCNC-2406 test dumps materials on account of the earnest research of experts and customers' feedbacks.

NEW QUESTION: 1 Rules issued by administrative agencies are published in the:
A. Congressional Record
B. Federal Register
C. Statutes at large
D. U.S. Code
E. None of the above
Answer: B

NEW QUESTION: 2 You use a recovery catalog for maintaining your database backups. You execute the following command: `$rman TARGET / CATALOG rman / cat@catdb RMAN > BACKUP VALIDATE DATABASE ARCHIVELOG ALL;` Which two statements are true? (Choose two.)
A. Corrupted blocks, if any, are repaired.
B. Backup sets containing both data files and archive logs are created.
C. Checks are performed to confirm whether all database files exist in correct locations.
D. Checks are performed for logical corruptions.
E. Checks are performed for physical corruptions.
Answer: C, E
Explanation: Explanation/Reference: Explanation: B (not C): You can validate that all database files and archived redo logs can be backed up by running a command as follows: `RMAN> BACKUP VALIDATE DATABASE ARCHIVELOG ALL;` This form of the command would check for physical corruption. To check for logical corruption, `RMAN> BACKUP VALIDATE CHECK LOGICAL DATABASE ARCHIVELOG ALL;` D: You can use the `VALIDATE` keyword of the `BACKUP` command to do the following: Check datafiles for physical and logical corruption Confirm that all database files exist and are in the correct locations. Note: You can use the `VALIDATE` option of the `BACKUP` command to verify that database files exist and are in the correct locations (D), and have no physical or logical corruptions that would prevent RMAN from creating backups of them. When performing a `BACKUP...VALIDATE`, RMAN reads the files to be backed up in their entirety, as it would during a real backup. It does not, however, actually produce any backup sets or image copies (Not A, not E).

NEW QUESTION: 3 Examine this command, which executes successfully: `mysqlbackup --defaults-file=/backups/server-my.cnf --backup-dir=/backups/full copy-back` Which statement is true about the `copy-back` process?
A. The `copy-back` process is used to overwrite a new backup over an existing backup.
B. It restores files from the data directory to their original MySQL server locations.
C. The `copy-back` process makes inconsistent backups.
D. It restores files from the backup directory to their original MySQL server locations.
Answer: A, D

NEW QUESTION: 4 You deploy an ASP.NET MVC e-commerce application to a Microsoft Azure App Services Web App. Users report that the Orders page displays incorrect date and time information. You are unable to reproduce the issue locally. You need to configure Remote

Debugging for the web application. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. **Answer:** Explanation: Explanation
