NEW QUESTION: 2 You need to resolve the log capacity issue.What should you do?**A.** Create an Application Insights Telemetry Filter.**B.** Set a LogCategoryFilter during startup.**C.** Change the minimum log level in the host.json file for the function.**D.** Implement Application Insights Sampling.**Answer: D**Explanation:ExplanationScenario, the log capacity issue: Developers report that the number of log message in the trace output for theprocessor is too high, resulting in lost log messages.Sampling is a feature in Azure Application Insights. It is the recommended way to reduce telemetry traffic andstorage, while preserving a statistically correct analysis of application data. The filter selects items that arerelated, so that you can navigate between items when you are doing diagnostic investigations. When metriccounts are presented to you in the portal, they are renormalized to take account of the sampling, to minimizeany effect on the statistics.Sampling reduces traffic and data costs, and helps you avoid throttling.References:
