Please remember us, Vlocity-Order-Management-Developer exam collection will help you pass exam with a nice passing score.

NEW QUESTION: 1What must be populated when entering Limits and Tolerances?**A.** Invoice Tolerance**B.** Base Currency**C.** PR Limit**D.** Organization**Answer: D**

NEW QUESTION: 2Drag and Drop QuestionDrag and drop the SPAN terms from the left onto the correct descriptions on the right.**Answer:** Explanation:

NEW QUESTION: 3Case StudyThis is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section.To start the case studyTo display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.OverviewBackgroundAlpine Skihouse designs and manufactures skis and ski accessories. The corporate headquarters for the company is located in London. The company has a design office in Rome and sales offices in Paris, Los Angeles, and Boston. The

design team director works in the Rome office. The company plans to implement Skype for Business Server 2015 to address their unified communications needs. The company currently has traditional PBX implementations in each office location and uses a dial-in conferencing system that is hosted on their internal PBX. The number of users in each office is shown in the following table: Remote connectivity to all corporate resources and services is provided by SSL virtual private network (VPN) only. The current VPN solution tunnels all traffic to the office. Internet facing services cannot be reached directly from users' laptops when they are traveling.

Problem statements During the requirements gathering process for the Skype for Business deployment project, users reported the following issues: Users based in the United States report that they experience poor audio and video quality when they conduct meetings with users that are not located in the United States. Users based in the United States report that they experience poor audio and video quality when they conduct meetings and calls while they are remotely connected to the office. The design team director would like customers to be greeted in the Italian language when they use dial-in conferencing to join meetings. The sales team director organizes daily alignment meetings with local sales teams. He reports that there are issues with the quality of the audio and video.

Proposed solution London The following table shows the proposed London Skype for Business Server 2015 server architecture and IP addresses: The following table shows the proposed Rome Skype for Business Server 2015 server architecture and IP addresses: Los Angeles The following table shows the proposed Los Angeles Skype for Business Server 2015 server architecture and IP address:

Requirements Business requirements The company has identified the following business requirements: Users must be able to access all Skype for Business services when they work remotely. The solution must support meetings with up to 10,000 users. The solution must be highly available, and must withstand the loss of a single component at any point in time with as little interruption of service as possible. The language used by Skype for Business services must be localized wherever possible. The leadership team in the Americas regions hosts an All Hands meeting for all employees four times per year. All employees are requested to join this meeting. You must not install any additional servers to support this requirement.

Technical requirements The company has identified the following technical requirements: The SQL team has completed an upgrade of the entire SQL Server to the latest version. They require every SQL Server to use a SQL AlwaysOn Availability Group as the high availability (HA) option. There is no data center within the Boston site. You must use the secondary data center in London to minimize the impact to users in the event of a single-site disaster. Media traffic must only be encrypted once. You must use the Skype for Business Management Shell `Invoke-CsComputerFailOver` and `Invoke-CsComputerFailBack` cmdlets to perform maintenance actions during daily operations. You must implement Domain Name System (DNS) load balancing wherever possible. You need to implement the dial-in conferencing request raised by the Design Director in Rome.

What should you do? **A.** Associate the Italian dial plan with the correct dial-in conferencing region. **B.** Set the primary language of the global conferencing policy to Italian (Italy). **C.** Set the primary language of the Italian trunk configuration to Italian (Italy). **D.** Associate the global conferencing policy with the correct dial-in conferencing region. **Answer: A**
