NEW QUESTION: 3**Answer:** Explanation: Explanation: In the Products table the SupplierName is dependent on the SupplierID, not on the ProductID. In the Orders table the ProductName is dependent on the ProductID, not on the OrderID. Note: A table is in third normal form when the following conditions are met: * It is in second normal form. * All non-primary fields are dependent on the primary key. Second normal form states that it should meet all the rules for First 1 Normnal Form and there must be no partial dependencies of any of the columns on the primary key. First normal form (1NF) sets the very basic rules for an organized database: * Define the data items required, because they become the columns in a table. Place related data items in a table. * Ensure that there are no repeating groups of data. * Ensure that there is a primary

key.References: <https://www.tutorialspoint.com/sql/third-normal-form.htm>
