But no matter what format, AD0-E328 test dumps will ensure you pass the exam successfully.

NEW QUESTION: 1The IASB's Framework for the Preparation and Presentation of Financial Statements identifies four possible measurement bases for use in financial statements Which of the following are those bases?**A.** historical cost, modified historical cost, realizable value, present value**B.** historical cost, current cost, realizable value, present value**C.** historical cost, modified historical cost, realizable value, current cost**D.** historical cost, resale value, realizable value , present value**Answer: B**

NEW QUESTION: 2**A.** Option B**B.** Option C**C.** Option A**D.** Option D**Answer: B****Explanation:***The environment setup for tablespace encryption is the same as that for transparent data encryption. Before attempting to create an encrypted tablespace, a wallet must be created to hold the encryption key.*Setting the tablespace master encryption key is a one-time activity. This creates the master encryption key for tablespace encryption. This key is stored in an external security module (Oracle wallet) and is used to encrypt the tablespace encryption keys.*Before you can create an encrypted tablespace, the Oracle wallet containing the tablespace master encryption key must be open. The wallet must also be open before you can access data in an encrypted tablespace.*Salt is a way to strengthen the security of encrypted data. It is a random string added to the data before it is encrypted, causing repetition of text in the clear to appear different when encrypted. Salt removes the one common method attackers use to steal data, namely, matching patterns of encrypted text.*ALT | NO SALT By default the database appends a random string, called "salt," to the clear text of the column before encrypting it. This default behavior imposes some limitations on encrypted columns: / If you specify SALT during column encryption, then the database does not compress the data in the encrypted column even if you specify table compression for the table. However, the database does compress data in unencrypted columns and encrypted columns without the SALT parameter.

NEW QUESTION: 3What are some of the customer benefits of thin computing? (Select three.)**A.** More choices of network connectivity**B.** Reduced desktop footprint g improved data security**C.** Increased software capabilities**D.** Increased computing power**E.** Reduced energy consumption**Answer: A,C,E**

NEW QUESTION: 4You want to change the default printer used by the Quick Print feature in some applications. Where should you change the Windows default printer?**A.** Within the Print Setup page**B.** Within the Devices and Printers user interface**C.** In the print queue**D.** In the printer's Properties window**Answer: B**
