EAOA_2024B – 100% Free Valid Exam Camp Pdf | Trustable ArcGIS Online Administration Associate 2024 - BETA Latest Test Questions

In addition, EAOA_2024B exam dumps are high-quality, and you can improve your efficiency if you use them, The preparation for EAOA_2024B actual exam test is very important and has an important effect on the actual exam test scores.

So our ultimate goal is being perfect about the quality and accuracy, which is tough, but we never say impossible, We at Photoexperienceacademy, offers real EAOA_2024B pdf questions.

I am really happy Photoexperienceacademy and I look forward to [Training 1z0-1003-22 Materials](#) using it again, Choosing us, you will no need to worry too much for your exam and certificate again.

NEW QUESTION: 1You need to design the solution for the government planning department. Which services should you include in the design?**A.** Azure SQL Data Warehouse and Polybase**B.** Azure SQL Data Warehouse and Elastic Queries**C.** Azure SQL Database and Elastic Queries**D.** Azure SQL Database and Polybase

Answer: A
Explanation:ExplanationPolyBase is a new feature in SQL Server 2016. It is used to query relational and non-relational databases (NoSQL) such as CSV files.Scenario: Traffic data must be made available to the Government Planning Department for the purpose of modeling changes to the highway system. The traffic data will be used in conjunction with other data such as information about events such as sporting events, weather conditions, and population statistics. External data used during the modeling is stored in on-premises SQL Server 2016 databases and CSV files stored in an Azure Data Lake Storage Gen2 storage account.Reference:

Case study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.To start the case studyTo display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions.

Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs.

When you are ready to answer a question, click the button to return to the question.Overview Litware, Inc. owns and operates 300 convenience stores across the US. The company sells a variety of packaged foods and drinks, as well as a variety of prepared foods, such as sandwiches and pizzas.Litware has a loyalty club whereby members can get daily discounts on specific items by providing their membership number at checkout.Litware employs business analysts who prefer to analyze data by using Microsoft Power BI, and data scientists who prefer analyzing data in Azure Databricks notebooks.Requirements. Business GoalsLitware wants to create a new analytics environment in Azure to meet the following requirements:* See inventory levels across the stores. Data must be updated as close to real time as possible.* Execute ad hoc analytical queries on historical data to identify whether the loyalty club discounts increase sales of the discounted products.* Every four hours, notify store employees about how many prepared food items to produce based on historical demand from the sales data.Requirements. Technical RequirementsLitware identifies the following technical requirements:* Minimize the number of different Azure services needed to achieve the business goals* Use platform as a service (PaaS) offerings whenever possible and avoid having to

provision virtual machines that must be managed by Litware.* Ensure that the analytical data store is accessible only to the company's on-premises network and Azure services.* Use Azure Active Directory (Azure AD) authentication whenever possible.* Use the principle of least privilege when designing security.* Stage inventory data in Azure Data Lake Storage Gen2 before loading the data into the analytical data store. Litware wants to remove transient data from Data Lake Storage once the data is no longer in use. Files that have a modified date that is older than 14 days must be removed.* Limit the business analysts' access to customer contact information, such as phone numbers, because this type of data is not analytically relevant.* Ensure that you can quickly restore a copy of the analytical data store within one hour in the event of corruption or accidental deletion.

Requirements. Planned Environment Litware plans to implement the following environment:

- * The application development team will create an Azure event hub to receive real-time sales data, including store number, date, time, product ID, customer loyalty number, price, and discount amount, from the point of sale (POS) system and output the data to data storage in Azure.*
- Customer data, including name, contact information, and loyalty number, comes from Salesforce and can be imported into Azure once every eight hours. Row modified dates are not trusted in the source table.*
- Product data, including product ID, name, and category, comes from Salesforce and can be imported into Azure once every eight hours. Row modified dates are not trusted in the source table.*
- Daily inventory data comes from a Microsoft SQL server located on a private network.*

Litware currently has 5 TB of historical sales data and 100 GB of customer data. The company expects approximately 100 GB of new data per month for the next year.* Litware will build a custom application named FoodPrep to provide store employees with the calculation results of how many prepared food items to produce every four hours.* Litware does not plan to implement Azure ExpressRoute or a VPN between the on-premises network and Azure.

NEW QUESTION: 2 An active project has a CPI of 0.92. Which of the following can be determined?
A. The project is currently over budget.
B. The project is behind schedule.

Reference

<http://smallbusiness.chron.com/project-management-cpi-numbers-mean-35541.html>
C. The project is ahead of schedule.
D. The project has a budget surplus.
Answer: A

NEW QUESTION: 3 What are the effects of alcohol on the skills you need to drive?
A. Reduces some mental skills needed
B. Reduces all mental and physical skills needed
C. Reduces some physical skills needed
D. Reduces all physical skills needed
E. Reduces all mental skills needed

Answer: B

NEW QUESTION: 4 Your network contains an Active Directory domain named contoso.com. The network contains a DHCP server named DHCP1. You add a new network segment to the network. On the new network segment, you deploy a new server named Server1 that runs Windows Server 2012 R2. You need to configure Server1 as a DHCP Relay Agent. Which server role should you install on Server1? To answer, select the appropriate role in the answer area.

Answer: Explanation: Explanation If you opt to create a centralized or hybrid DHCP infrastructure, you will need a DHCP relay agent on every subnet that does not have a DHCP server on it. Many routers are capable of functioning as DHCP relay agents, but in situations where they are not, you can configure a Windows Server 2012 computer to function as a relay agent. In Windows Server 2012 R2 the DirectAccess feature and the RRAS role service were combined into a new unified server role. This new Remote Access server role allows for centralized administration, configuration, and monitoring of both DirectAccess and VPN-based remote access services. Additionally, Windows Server 2012 R2 DirectAccess provided multiple updates and improvements to address deployment blockers and provide simplified management.
