**NEW QUESTION: 1** SIMULATION Scenario: Provisioning Services has been installed to facilitate the deployment of Windows 8 desktops and web servers. A Citrix Engineer is instructed to provision web servers using the Web\_Server vDisk. The engineer needs to create a target device and add the device to Active Directory. The following pieces of information have been provided: Server name: CCHWebServer IP address: 192.168.10.115 MAC address: fa:49:fd:63:7b:be The machine account password for the new server in Active Directory needs to be changed every seven days. As the Citrix Engineer, use the existing site, store, and device collection to implement the tasks below. Tasks: 1. Create a target device named CCHWebServer. 2. Assign the Web\_Server vDisk to the newly created target device. 3. Enable AD account password management on the vDisk. 4. Enable automatic password support in the properties of the current server. 5. Create a machine account in AD for the target device and place the machine account in the Web Server OU. **Answer:** Explanation: The wizard is run directly from a Provisioning Services Console. Explanation/Reference: The wizard is run directly from a Provisioning Services Console. Note: For convenient reuse, the most recently used hypervisor and username will be cached in the registry of the local machine running this instance of the Console. Note: XenServer 5.5 Update 2 hypervisors are not supported in the 5.6.1 Streamed VM Setup Wizard. System Center Virtual Machine Management (SCVMM) servers require PowerShell 2.0 to be installed. Web\_Server vDisk1 VM per the Simulation- CCHWebServer Note: An Active Directory administrator will need to delegate rights to the Provisioning Services Console user to allow Active Directory account creation. Note: The domain and OU default to those of the current user. Note: New computer names to be created are first validated that they do not already exist as computers in Active Directory, VMs, or target devices. Use - Web Server OU Note:

Clicking Cancel cancels the configuration of any additional machines, and the quantity of successfully configured machines displays under the Progress bar. If the wizard fails or is cancelled in the middle of an operation, any progress made is retained. If cleanup of existing progress is required, it must be done manually.
