NEW QUESTION: 1A cloud administrator is designing security policies for the control plane of a private Cloud. Which two statements about control plane Cloud Security are true? (Choose two.)**A.** A dynamic control plane must be able to intercept traffic as it traverses the cloud, interpret the data, and instruct the cloud architecture on how to efficiently connect the user to the appropriate application instance.**B.** The dynamic control plane does not require visibility into the data plane and all components that operate within the data plane.**C.** Dynamic control plane elements are a requirement at every layer of the cloud architecture for cloud environments to be operationally efficient and on demand.**D.** The dynamic control plane is not required to have visibility to all traffic between the user and the applications.**Answer: C,D**

NEW QUESTION: 2An IS auditor discovers that developers have operator access to the command line of a production environment operating system. Which of the following controls would BEST mitigate the risk of undetected and unauthorized program changes to the production environment?**A.** Hash keys are calculated periodically for programs and matched against hash keys calculated for the most recent authorized versions of the programs**B.** Access to the operating system command line is granted through an access restriction tool with preapproved rights**C.** Commands typed on the command line are logged**D.** Software development tools and compilers have been removed from the production environment
Answer: AExplanation:Explanation/Reference:Explanation:The matching of hash keys over time would allow detection of changes to files. Choice A is incorrect because having a log is not a control, reviewing the log is a control. Choice C is incorrect because the access was already granted-it does not matter how. Choice D is wrong because files can be copied to and from the production environment.
