All the routes are in the passive mode because these routes are in the hold-down state.****Answer: A,B,D**  
**Explanation:**It can be determined that AS 200 is used, from the fact that the IS-IS process ID is labeled as 200. The best path to reach the network 192.168.1.48/28 is the first one displayed in the routing table.
