**NEW QUESTION: 1** A \_\_\_\_\_ contains detailed information about the documents that the system posts while conducting business transactions, one **A.** None of the above **B.** Fact data **C.** factsheet **D.** Fact paper **Answer: C**

**NEW QUESTION: 2** The user SCOTT owns the CUST table that is placed in the SALES tablespace. The user SCOTT opens a session and executes commands as follows: SQL> INSERT INTO cust VALUES(101, 'JACK'); 1 row created. SQL> INSERT INTO cust VALUES(102, 'SMITH'); 1 row created. As a DBA, you execute the following command from another session: ALTER TABLESPACE sales READ ONLY; Which statement is true regarding the effect of this command on the transaction in Scott's session? **A.** The command hangs until all transactions on the objects in the tablespace commit or rollback, and then the tablespace is placed in read-only mode. **B.** The transaction in Scott's session is rolled back and the tablespace becomes read-only. **C.** The command fails as a transaction is still pending. **D.** The command waits and the user SCOTT can execute data manipulation language (DML) statements only as part of the current transaction. **Answer: D** Explanation: You can issue the ALTER TABLESPACE...READ ONLY statement while the database is processing transactions. After the statement is issued, the tablespace is put into a transitional read-only state. No transactions are allowed to make further changes (using DML statements) to the tablespace. If a transaction attempts further changes, it is terminated and rolled back. However, transactions that already made changes and that attempt no further changes are allowed to commit or roll back.
