NEW QUESTION: 3 Scenario: A Citrix Architect is designing a new Citrix Virtual Apps and Desktops environment for a company that maintains branch offices in New York, Chicago, and Miami. Management has described the following requirements for the environment: * The Citrix Virtual Apps and Desktops Site must be located in the company headquarters in Miami. * All users will only need to access their default local print queue from within their HDX sessions. * Users in Chicago need access to printers hosted on a Citrix Universal Print Server located in New York. * Printing performance and bandwidth usage must be optimized where possible. * The environment must be highly available. * The auto-created client printer models must function with no additional configuration needed. Click the Exhibit button to review the printing requirements. What does the architect need to do to meet the printing requirements for the users in Chicago? **A.** Enable the Auto-create client printers policy with 'Auto-create all client printers' setting enabled. Enable the Universal print driver usage policy to 'Use universal printing only'. Apply the policy to Chicago users. Then, install and configure the Citrix Universal Print Server components and configure the Universal Print Server policy to 'Enabled with fallback to Windows native remote printing'. Last, create a session printer policy, add the network printers that will use the Universal Print Server, and apply the policy to all users. **B.**
