NEW QUESTION: 1Applications have evolved towards the cloud-native (CloudNative) model, and microservices are the de facto standard for CloudNative.**A. CorrectB. ErrorAnswer: A**

NEW QUESTION: 2Which of the following statements best describes an activity in a project?**A.** It is the effort needed to complete a work package.**B.** It is a listing of all project work that must be accomplished for the project scope to be considered complete.**C.** It is a defined set of functions a resource must complete for the project scope to be considered complete.**D.** It is the unit of resource utilization needed to complete a project deliverable.**Answer: A**
Explanation: Explanation/Reference:Explanation:An activity is the effort needed to complete a work package. The activities are linked to the work packages in the WBS. An activity is the element of work performed throughout the various stages of a project. It is a group of people, communications, processes, and work items that correspond to a joint effort to achieve a goal. An activity is a way to manage the work collectively with others in any organization. The create WBS process identifies the deliverables at the lowest level in the WBS, called the work package. Project work packages are divided into smaller elements known as activities, which correspond to the work required to complete the work package.**Incorrect Answers:**A, C: These are not valid definitions of an activity.D: This is a definition of all the work that the project team and manager must complete in order to complete the total activity list.

NEW QUESTION: 3A company has offices in multiple geographic locations. The sites have high-latency, low- bandwidth connections. You need to implement a multisite Windows Deployment Services(WDS) topology for deploying standard client device images to all sites. Solution: At each site, you create a multicast deployment. You pre-stage the client images that you plan to deploy and point them to the local WDS server.Does this meet the goal?**A. NoB. YesAnswer: B**
Explanation:On of the advantages of prestaging clients is the ability for multiple WindowsDeployment Services servers to service the same network segment. You can do this by restricting the server to answer only a particular set of clients.**Reference:** Prestaging Client Computers[https://technet.microsoft.com/en-us/library/cc770832\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/cc770832(v=ws.10).aspx)
