<https://www.credera.com/blog/infrastructure/understanding-windows-updates-for-pcs-with-microsoft-intune/> Topic 4, Contoso Ltd Overview You are the system administrator for an insurance company named Contoso, Ltd. The company has an on-premises Active Directory Services (AD DS) domain named contoso.com, and a Microsoft Office 365 environment. You deploy the following operating systems across the enterprise: You configure removable storage usage auditing for all Dallas devices. Contractors You hire 25 contractors. The contractors must use their own devices to access Microsoft SharePoint Online sites in the company's Office 365 environment. They must use Windows BitLocker and store a recovery key in Microsoft OneDrive. User synchronization and authentication You need to implement synchronization between the on-premises AD DS domain and the Office 365 environment. The solution must use the latest supported Microsoft technologies. Users must be able to reset their own passwords by using the Microsoft Office 365 portal. When a user resets their Office 365 password, the password for the user's on-premises AD DS account must also reset. Users must be able to sign in to Office 365 by using their AD DS credentials. Security You must prevent all users in Seattle except Sales users from using any removable devices. Sales users must be able to fully access locally attached tape drives. Sales users must be prevented from writing to removable drives. Technical requirements General You deploy a new application to the devices in Seattle. Sales department users in Seattle run an application that only works on devices that run Windows 7. You deploy a new display driver to all devices in Dallas. Backup and Recovery You create system

images for all devices that run Windows 7. You must create a new system image each time you update these devices. You schedule file versioning for these devices to occur at 09:00 and 17:00 each day on Monday through Friday. All devices that run Windows 10 must back up the C:\CompanyDoes folder to a network drive. You must configure all devices that run Windows 8.1 to use a recovery drive. Monitoring You must review and take action on any alerts for Active Directory Federation Services (AD FS) applications. You must create detailed views of AD FS log on patterns. You must minimize the number of open firewall ports. You must monitor audit events for all devices used by the Marketing user group. Problem Statements User1 makes frequent changes to a Microsoft Excel workbook each day. Today at 12:00, User1 overwrites the existing document on a device that runs Windows 7. Users in Seattle report a variety of computer issues. You must use the quickest method to revert the devices to a working state. Users in Dallas also report issues. You must correct the issues that are interfering with existing applications or files.

**NEW QUESTION: 3** When auditing a proxy-based firewall, an IS auditor should: **A.** verify that the filters applied to services such as HTTP are effective. **B.** review Address Resolution Protocol (ARP) tables for appropriate mapping between media access control (MAC) and IP addresses. **C.** verify that the firewall is not dropping any forwarded packets. **D.** test whether routing information is forwarded by the firewall. **Answer: A** Explanation: Explanation/Reference: Explanation: A proxy-based firewall works as an intermediary (proxy) between the service or application and the client, it makes a connection with the client and opens a different connection with the server and, based on specific filters and rules, analyzes all the traffic between the two connections. Unlike a packet-filtering gateway, a proxy-based firewall does not forward any packets. Mapping between media access control (MAC) and IP addresses is a task for protocols such as Address Resolution Protocol/Reverse Address Resolution Protocol (ARP/RARP).
