NEW QUESTION: 1 VPN users report that they cannot access shared resources in the branch offices. They can access shared resources in the main office. Users in the main office report that they can access shared resources in the branch offices. You need to ensure that the VPN users can access shared resources in the branch offices. What should you request? **A.** that the routers between the main office and the branch offices be reconfigured **B.** that a DNS record for servers in the branch offices be added to the Internet DNS zone for fourthcoffee.com **C.** that VPN1 be configured to support PPTP-based VPN connections **D.** that a change be made to the routing table on VPN1
Answer: D
Explanation: Explanation/Reference: Testlet 1 Scenario: You are an enterprise desktop support technician for Wingtip Toys. Wingtip Toys has two offices. Active Directory Configuration The network contains a single Active Directory domain. An Active Directory site exists for each office. The network contains the organizational units (OUs) that are shown in the following table. The network contains an enterprise root certification authority (CA). Certificate autoenrollement is enabled for all users. Network Configuration Each office has a wireless network. You control access to the wireless network in office 1 by using Network Access Protection (NAP). A Group Policy object (GPO) named GPO1 configures the NAP settings for the computers in office 1. Resource Access The Documents folders of all users are encrypted by using Encrypting File System (EFS). The Documents folders of all users are backed up daily. A Web server named Web1 hosts an internal Web site named WebSite1. Users connect to WebSite1 from the Internet by using the URL http://website1.wingtiptoy.com. The domain name website1.wingtiptoy.com is resolved by using the Hosts file that is located on each client computer. Users frequently work from home. Home users connect to the internal network by using SSTP-based VPN connections. Line of Business Applications Your company has a line-of-business application named App1. App1 is installed only on computers that run Windows XP. You test App1 by using the Microsoft Application Compatibility Toolkit (ACT). ACT reports that App1 can be made compatible to run on Windows 7.
