By the way, to assure you will get the latest Databricks-Certified-Data-Engineer-Associate exam practice materials successfully, please contact with our staffs if you have abandoned your reserved mail address.

NEW QUESTION: 1A. Option B**B. Option A****Answer: B****Explanation:**The NRPT stores configurations and settings that are used to deploy DNS Security Extensions (DNSSEC), and also stores information related to DirectAccess, a remote access technology.**Note:** The Name Resolution Policy Table (NRPT) is a new feature available in Windows Server 2008 R2. The NRPT is a table that contains rules you can configure to specify DNS settings or special behavior for names or namespaces. When performing DNS name resolution, the DNS Client service checks the NRPT before sending a DNS query. If a DNS query or response matches an entry in the NRPT, it is handled according to settings in the policy. Queries and responses that do not match an NRPT entry are processed normally.**References:**
