NEW QUESTION: 1 Refer to the exhibit. Given the API documentation for the UCS SDK python class, UcsHandle, which code snippet creates a handle instance?
A. Option DB. Option CC. Option AD. Option B
Answer: D

NEW QUESTION: 2 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are deploying an Azure Machine Learning model to an Azure Kubernetes Service (AKS) container. You need to monitor the accuracy of each run of the model. Solution: You modify the scoring file. Does this meet the goal?
A. No **B.** Yes
Answer: B

NEW QUESTION: 3 Universal Containers has a SOAP-based integration that runs nightly to update the Product(Product2) object in Salesforce with updated product availability for over 500,000 products. The source system is a green-screen ERP that must be taken offline to produce nightly production reports, such as the inventory availability report used for this integration. The integration is performing very slowly and does not complete within the allocated four-hour time slot. What three recommendations might a Technical Architect make to resolve this issue? Choose 3 answers
A. Contact Salesforce support to request that they turn off record locking on the Product2 object. **B.** Pre-process the data to avoid the need for workflow rules or triggers **C.** Store the Salesforce Product ID in the source system to eliminate the need for External IDs and UPSERT API calls. **D.** Use the Bulk API UPDATE or UPSERT records more efficiently. **E.** Use outbound Messaging to notify Salesforce promptly when product availability changes in the source system.
Answer: B,C,D
