NEW QUESTION: 1Where do you customize project e-mail templates?Please choose the correct answer.
Response:**A.** Sourcing Project**B.** Sourcing Library**C.** Sourcing Project Template**D.** Project Manager
Answer: C

NEW QUESTION: 2Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2.The network has the physical sites and TCP/IP subnets configured as shown in the following table.You have a web application named App1 that is hosted on six separate Web servers. DNS has the host names and IP addresses registered as shown in the following table.You discover that when users connect to appl.contoso.com, they are connected frequently to a server that is not on their local subnet.You need to ensure that when the users connect to appl.contoso.com, they connect to a server on their local subnet. The connections must be distributed across the servers that host appl.contoso.com on their subnet.Which two settings should you configure?To answer, select the appropriate two settings in the answer area.**Answer:** Explanation:ExplanationDNS Round Robin is a mechanism for choosing an IP address from the list returned by a DNS server so that all clients won't get the same IP address every time. Netmask ordering is a mechanism for further optimizing which IP address is used by attempting to determine the closest result.Reference: DNS Round Robin and Destination IP address selection

NEW QUESTION: 3A system administrator has configured a cluster containing 40 servers. The cluster members all belong to one core group. While examining the log files, the administrator notices that the core group coordinator is consuming abnormally high amounts of memory and CPU resources.How can the system administrator reduce the memory and CPU resource usage of the core group coordinator?**A.** Decrease the memory on the machine.**B.** Move the coordinator to another machine.**C.** Configure a second active coordinator.**D.** Configure a core group bridge.**Answer: C**Explanation:Remember that coordinator election occurs whenever the view changes. Electing a new coordinator uses a lot of resources because this process causes increased network traffic and CPU consumption. Specifying a preferred coordinator server, whenever practical, helps eliminate the need to make frequent coordinator changes.
