どのデータベースタイプを使用しますか？**A. NoSQL****B. Relational****C. Blobstore****D. Flat file****Answer:**

AExplanation:Relational databases were not designed to cope with the scale and agility challenges that face modern applications, nor were they built to take advantage of the commodity storage and processing power available today.NoSQL fits well for:Developers are working with applications that create massive volumes of new, rapidly changing data types - structured, semi-structured, unstructured and polymorphic data.Incorrect Answers:D: The Blobstore API allows your application to serve data objects, called blobs, that are much larger than the size allowed for objects in the Datastore service. NEW QUESTION: 2In evaluating the hierarchy of authority in tax law, which of the following carries the greatest authoritative value for tax planning of transactions?**A. Internal Revenue Code****B. IRS agents' reports****C. IRS regulations****D. Tax court decisions****Answer: A**Explanation: ExplanationNote: This question is addressed in your Appendix D text materials. We are confident that our students would be able to respond correctly over 85% of the time without any guidance on this topic. The answer is rather obvious. Just by looking at the answer options, you will immediately notice that Option A is presented in title case. This would be a quick sign

that it may be the correct response. Further, we suspect that most students would narrow the options down to "a" or "b" by simply using common sense. While we are confident that our students would fare well on this question if it appeared on their exams, we present the following detailed explanation of the answer options. Choice "a" is correct. According to the IRS's website under Tax Code, Regulations and Official Guidance, the "federal tax law begins with the Internal Revenue Code (IRC), [which was] enacted by Congress in Title 26 of the United States Code (26 U.S.C.)." The IRC holds the most authoritative value. Choice "b" is incorrect. According to the IRS's website under Tax Code, Regulations and Official Guidance, the IRS regulations or "Treasury regulations (26 C.F.R.)-commonly referred to as Federal tax regulations-pick up where the Internal Revenue Code (IRC) leaves off by providing the official interpretation of the IRS by the U.S. Department of Treasury." Regulations give directions on how to apply the law outlined in the Internal Revenue Code. Regulations have the second most force and effect, second only to the IRC. Choice "c" is incorrect. Tax court decisions interpret the Internal Revenue Code. They do not have the authority of the IRC. Choice "d" is incorrect. The reports of IRS agents are used to report on specific taxpayer situations. IRS agents' reports apply the Internal Revenue Code, IRS regulations, and other forms of authoritative literature, but they do not hold the value that the IRC, the IRS regulations, or even tax court decisions have. Individual Taxation - Exemptions
