The have made a lot of efforts to test the program, In today's **Practice 1z0-1127-24 Test Online** society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities.

You can confirm quality of the exam dumps by experiencing free demo.

**NEW QUESTION: 1**You have been hired as a Database Consultant by ABC.com to design a SQL Server 2014 database solution.You are tasked with designing a scale-out and high-availability SQL Server 2014 Online Transaction Processing (OLTP) database solution that will maintain copies of data across two server instances.Your solution must provide scale-out of read operations by distributing the reads from clients across two SQL Server 2014 nodes. The data in both SQL Server nodes needs to be indexed.What should you include in your solution?**A.** You should include a primary database with scheduled log shipping to the secondary database configured.**B.** You should include two servers in a Synchronous-Commit Availability Mode Availability Group.**C.** You should include two servers in an Asynchronous-Commit Availability Mode Availability Group.**D.** You should include a primary SQL Server 2014 database that uses transactional replication to replicate data to the secondary database.**E.** You should include two servers configured in an Active-Passive SQL Server 2014 Cluster.**Answer: D**Explanation: Peer-to-peer replication provides a scale-out and high-availability solution by maintaining copies of data across multiple server instances, also referred to as nodes.Built on the foundation of transactional replication, peer-to-peer replication propagates transactionally consistent changes in near real-time. This enables applications that require scale-out of read operations to distribute the reads from clients across multiple nodes.Because data is maintained across the nodes in near real-time, peer-to-peer replication provides data redundancy, which increases the availability of data.
