NEW QUESTION: 2The data item 'New Date is a date data item with no initial value.The calculation stage is configured as follows:What will happen when you execute the Create Date stage?**A.** 1 week will be added to today's date and the result stored in the New Date data item.**B.** 1 month will be added to today's date and the result stored in the New Date data item.**C.** 5 days will be added to today's date and the result stored in the New Date data item.**D.** The process will throw an exception as the New Date data item is null.**Answer: A**

NEW QUESTION: 3You are developing an HTML5 web application and are styling text.You need to use the text-transform CSS property.Which value is valid for the text-transform property?**A.** Italic**B.** Capitalize**C.** Line-through**D.** Red**Answer: B**

Explanation:CSS Syntaxtext-transform:

none|capitalize|uppercase|lowercase|initial|inherit;ExampleTransform text in different elements:h1 {text-transform:uppercase;}h2 {text-transform:capitalize;}p

{text-transform:lowercase;}Reference: CSS text-transform Property

http://www.w3schools.com/cssref/pr_text_text-transform.asp

NEW QUESTION: 4You develop an ASP.NET Core MVC application. You configure the application to track webpages and custom events.You need to identify trends in application usage.Which Azure Application Insights Usage Analysis features should you use? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content. NOTE: Each correct selection is worth one point. **Answer:** Explanation:
Explanation: Box 1: Users Box 2: Impact One way to think of Impact is as the ultimate tool for settling arguments with someone on your team about how slowness in some aspect of your site is affecting whether users stick around. While users may tolerate a certain amount of slowness, Impact gives you insight into how best to balance optimization and performance to maximize user conversion. Box 3: Retention The retention feature in Azure Application Insights helps you analyze how many users return to your app, and how often they perform particular tasks or achieve goals. For example, if you run a game site, you could compare the numbers of users who return to the site after losing a game with the number who return after winning. This knowledge can help you improve both your user experience and your business strategy. Box 4: User flows The User Flows tool visualizes how users navigate between the pages and features of your site. It's great for answering questions like: How do users navigate away from a page on your site? What do users click on a page on your site? Where are the places that users churn most from your site? Are there places where users repeat the same action over and over?
Incorrect Answers: Funnel: If your application involves multiple stages, you need to know if most customers are progressing through the entire process, or if they are ending the process at some point. The progression through a series of steps in a web application is known as a funnel. You can use Azure Application Insights Funnels to gain insights into your users, and monitor step-by-step conversion rates. References:
