And the study materials are based on the past years of the exam really and industry trends through rigorous analysis and summary, Printable H23-131_V1.0 PDF Format.

So we strongly advise you to have a try on our H23-131_V1.0 study guide, Our H23-131_V1.0 practice materials have inspired millions of exam candidates to pursuit their dreams and motivated them to learn more high-efficiently.

Our Huawei Certified Professionals make sure that H23-131_V1.0 exam questions cover all core exam topics, allowing you to better understand the important exam topics.

NEW QUESTION: 1 Which of the following is from the Internet Architecture Board (IAB) Ethics and the Internet (RFC 1087)?**A.** There must not be personal data record-keeping systems whose very existence is secret.**B.** Users should execute responsibilities in a manner consistent with the highest standards of their profession.**C.** Access to and use of the Internet is a privilege and should be treated as such by all users of the systems.**D.** There must be a way for a person to prevent information about them, which was obtained for one purpose, from being used or made available for another purpose without their consent.**Answer: C**Explanation:The IAB strongly endorses the view of the Division Advisory Panel of the National Science Foundation Division of Network, Communications Research and Infrastructure which, in paraphrase, characterized as unethical and unacceptable any activity which purposely:(a)seeks to gain unauthorized access to the resources of the Internet,(b)disrupts the intended use of the Internet,(c)wastes resources (people, capacity, computer) through such actions,(d)destroys the integrity of computer-based information, and/or(e)compromises the privacy of users.The Internet exists in the general research milieu. Portions of it continue to be used to support research and experimentation on networking. Because experimentation on the Internet has the potential to affect all of its components and users, researchers have the responsibility to exercisegreat caution in the conduct of their work.Negligence in the conduct of Internet-wide experiments is both irresponsible and unacceptable.The IAB plans to take whatever actions it can, in concert with Federal agencies and otherinterested parties, to identify and to set up technical and procedural mechanisms to make theInternet more resistant to disruption.In the final analysis, the health and well-being of the Internet is the responsibility of its users who must, uniformly, guard against abuses which disrupt the system and threaten its long-term viability.NOTE FROM CLEMENT:For the purpose of the exam, ensure you are very familiar with the ISC2 code of ethics. There willbe a few questions on the exam related to it and you must also sign and agree to the code in orderto take the exam. The code of ethics consist of 4 high level cannons. Do ensure you know theorder of the 4 cannons, the first one listed it the most important.See an extract of the code below:CodeAll information systems security professionals who are certified by (Isc)2 recognize that suchcertification is a privilege that must be both earned and maintained. In support of this principle, all(Isc)2 members are required to commit to fully support this Code of Ethics (the "Code"). (Isc)2members who intentionally or knowingly violate any provision of the Code will be subject to actionby a peer review panel, which may result in the revocation of certification. (Isc)2 members areobligated to follow the ethics complaint procedure upon observing any action by an (ISC)2member that breach the Code.

Failure to do so may be considered a breach of the Code pursuantto Canon IV.There are only four mandatory canons in the Code. By necessity, such high-level guidance is notintended to be a substitute for the ethical judgment of the professional.Code of Ethics Preamble:The safety and welfare of society and the common good, duty to our principals, and to each other,requires that we adhere, and be seen to adhere, to the highest ethical standards of behavior.Therefore, strict adherence to this Code is a condition of certification.Code of Ethics Canons:Protect society, the common good, necessary public trust and confidence, and the infrastructure.Act honorably, honestly, justly, responsibly, and legally.Provide diligent and competent service to principals.Advance and protect the profession.The following are incorrect answers:-Users should execute responsibilities in a manner consistent with the highest standards of their profession is incorrect because it is from the (ISC)2 code of ethics.-There must not be personal data record-keeping systems whose very existence is secret is incorrect because if is from the U.S. Department of Health, Education, and Welfare Code of Fair Information Practices.-There must be a way for a person to prevent information about them, which was obtained for one purpose, from being used or made available for another purpose without their consent is incorrect because if is from the U.S. Department of Health, Education, and Welfare Code of Fair Information Practices.Reference(s) used for this question: https://www.isc2.org/uploadedFiles/%28ISC%292_Public_Content/Code_of_ethics/ISC2-Code -of-Ethics.pdf and http://tools.ietf.org/html/rfc1087 and http://simson.net/ref/2004/csg357/handouts/01_fips.pdf

NEW QUESTION: 2A user brian is configured to use the bash shell. His home directory is /export/home/brian, and contains a .profile and a .bashrc file. In the -profile, there are these lines: genius =ritchie export geniusIn the .bashrc us this line: genius=kernighanIn /etc/profile are these lines: genius=thompson export geniusWhen brian logs in and asks for the value of genius, what will he find, and why?**A.** genius willbekernighan, because .bashrc executes after.profile.**B.** geniuswill be ritchie, because that was the value exported in .profile.**C.** genius will be thompson because /etc/profile system settings always override local settings.**D.** genius will be ritchie because variable settings in .profile take precedence over variable settings in .bashrc.**E.** genius will be ritchie because .profile executes after .bashrc.**Answer: D**

NEW QUESTION: 3 In the mirroring scenario of OceanStor VIS6600T, an engineer detected an abnormal mirroring alarm on theVIS6600T. When you login to the ISM interface, you can view the mirror status of the volume in thecorresponding logical disk group based on the alarm and find that the status of a volume in the mirror isNODEVICE.The reason may be: (multiple choice) **A.** All optical links between the VIS 6600T and the array in which the failed mirror volume is located havefailed**B.** Array where the failed mirrored volume is powered down**C.** The disk on the array on which the failed mirrored volume failed**D.** The RAID array is degraded on the array where the failed mirrored volume is residing, and the hot spareis being rebuilt**Answer: A,B,C**

NEW QUESTION: 4 Which three options describe information that can be captured with the show iscsi stats iscsi x/y detail command? (Choose three.)**A.** duplex of the iSCSI interface**B.** data CRC error**C.** PDU or frame drop occurrences**D.** buffer credits**E.** speed of the iSCSI interface**F.** TMF-REQ and TMF-RESP**Answer: B,C,F**
