Active learning, or the process of continuing to train on new utterances, is essential to machine-learned intelligence that LUIS provides.Box 2: creating intentsEach intent needs to have example utterances, at least 15. If you have an intent that does not have any example utterances, you will not be able to train LUIS. If you have an intent with one or very few example utterances, LUIS will not accurately predict the intent.Box 3: never publishedIn each iteration of the model, do not add a large quantity of utterances.
