Accuracy and relevance of the questions in the AD0-E556 Question Bank.

NEW QUESTION: 1You manage Windows 7 and Windows 8.1 client computers that run. You are configuring Windows updates for all client computers. You have the following requirements:- Ensure that all client computers check for updates twice a day, - Install all critical and available updates, including updates that require a restart, each day. - If critical updates are installed, restart client computers at 11:00 P.M. You need to configure local Group Policy settings to meet the requirements. Which three actions should you perform? (Each answer presents part of the solution. Choose three.) **A.** Enable the Reschedule Automatic Updates scheduled installations policy setting. **B.** Configure the Automatic Updates detection frequency policy setting. **C.** Enable the Specify intranet Microsoft update service location policy setting. **D.** Configure the Automatic Maintenance Activation Boundary policy setting. **E.** Enable the Configure Automatic Updates policy setting for automatic download and scheduled installation. **Answer: B,C,E** **Explanation:** <http://technet.microsoft.com/en-us/library/dn595129.aspx> **Step 5: Configure Group Policy Settings for Automatic Updates** **Specify intranet Microsoft update service location** Specifies an intranet server to host updates from Microsoft Update. You can then use WSUS to automatically update computers on your network. **Automatic Updates detection frequency** Specifies the hours that Windows will use to determine how long to wait before checking for available updates. The exact wait time is determined by using the hours specified here minus zero to twenty percent of the hours specified. For example, if this policy is used to specify a 20 hour detection frequency, all clients to which this policy is applied will check for updates anywhere between 16 and 20 hours. **Configure Automatic Updates** Specifies specify whether automatic updates are enabled on this computer. If enabled, you must select one of the four options provided in this Group Policy setting. **Specifies that Windows recognizes when the computer is online and uses its Internet connection to search Windows Update for available updates.** **2 - Notify for download and notify for install** When Windows Update finds updates that apply to the computer, users will be notified that updates are ready for download. Users can then run Windows Update to download and install any available updates. **3 - Auto download and notify for install (default setting)** Windows Update finds applicable updates and downloads them in the background; the user is not notified or interrupted during the process. When the downloads are complete, users are notified that there are updates ready to install. Users can then run Windows Update to install the downloaded updates. **4 - Auto download and schedule the install** You can specify the schedule by using the options in this Group Policy setting. If no schedule is specified, the default schedule for all installations will be every day at 3:00 A.M. If any updates require a restart to complete the installation, Windows will restart the computer automatically. (If a user is signed in to the computer when Windows is ready to restart, the user will be notified and given the

option to delay the restart.)5 - Allow local admin to choose setting Specifies whether local administrators are allowed to use the Automatic Updates control panel to select a configuration option of their choice-for example, whether local administrators can choose a scheduled installation time. Further Information: Reschedule Automatic Updates scheduled installations Specifies the amount of time for Automatic Updates to wait following a computer startup, before proceeding with a scheduled installation that was previously missed. If the status is set to Not Configured, a missed scheduled installation will occur one minute after the computer is next started. Automatic Maintenance Activation Boundary This policy enables you to configure the "Automatic Maintenance activation boundary" setting. The maintenance activation boundary is the daily scheduled time at which Automatic Maintenance starts.
<http://msdn.microsoft.com/en-us/library/windows/desktop/hh848037%28v=vs.85%29.aspx>
Automatic Maintenance Windows depends on execution of inbox and third party maintenance activity for much of its value-add, including Windows Update, and automatic disk defragmentation, as well as antivirus updates and scans.

NEW QUESTION: 2 Examine the structure and data in the PRICE_LIST table: Name Null? Type
PROD_ID NOT NULL NUMBER(3) PROD_PRICE VARCHAR2(10) PROD_ID PROD PRICE100 \$234.55
101 \$6,509.75 102 \$1,234 in the same format as the PROD_PRICE. Which SQL statement would give the required result?
A. SELECT TO_NUMBER(TO_NUMBER(prod_price, '\$99.999.99') * .25 / \$99.999.00) FROM PRICE_LIST;
B. SELECT TO_CHAR(prod_price * .25, '\$99.999.99') FROM PRICE_LIST;
C. SELECT TO_CHAR(TO_NUMBER(prod_price, '\$99.999.99') * .25, '\$99.999.00') FROM PRICE_LIST;
D. SELECT TO_CHAR(TO_NUMBER(prod_price) * .25, '\$99.999.00') FROM PRICE_LIST;
Answer: C

NEW QUESTION: 3 Christine needs to make an AJAX call to a method named "getAddress" in her model. How would she get the URL to the method in a Client JavaScript builder?
A.

<%=webAppAccess.getAjaxURL("getAddress", false)%>
B.

<%=webAppAccess.getBackchannelURL("getAddress", false)%>
C.

<%=webAppAccess.getBackchannelActionURL("getAddress", false)%>
D.

<%=webAppAccess.getActionURL("getAddress", false)%>
Answer: C
