In addition, the mode of Media-Cloud-Consultant learning guide questions and answers is the most effective for you to remember the key points.

NEW QUESTION: 1 HOTSPOT You need to implement the file share for the new virtual desktop environment. How should you configure the implementation? To answer, select the appropriate option from each list in the answer area. Hot Area: **Answer:** Explanation:

NEW QUESTION: 2 Which option is a difference in the set of questions that Cisco's approach to outcomes-based sales users? **A.** The product approach answers the question of how progress is displayed and correctly communicated, while the outcomes approach answers what the business objectives services must be included in each solution. **B.** The product approach answers the question of what product is needed, while the outcomes approach answers what capabilities are needed to achieve the solutions. **C.** The product approach answers the question of what capabilities are needed to deliver product & services, while the outcomes approach gives an answer to what the business rules and capabilities are. **D.** The product approach answers the question of what product is needed, while the outcomes approach answers what the business objectives and desired outcomes are. **Answer: D**

NEW QUESTION: 3 A new company registers the domain name of contoso.com. The company has a web presence on the Internet. All Internet resources have names that use a DNS suffix of contoso.com. A third-party hosts the Internet resources and is responsible for managing the contoso.com DNS zone on the Internet. The zone contains several hundred records. The company plans to deploy an Active Directory forest. You need to recommend an Active Directory forest infrastructure to meet the following requirements: Ensure that users on the internal network can resolve the names of the company's Internet resources. Minimize the amount of administrative effort associated with the addition of new Internet servers. What should you recommend? **A.** A forest that contains a single domain named contoso.com **B.** A forest that contains a root domain named contoso.com and another domain named ad.contoso.com **C.** A forest that contains a single domain named contoso.local **D.** A forest that contains a root domain named contoso.com and another domain named contoso.local **Answer: C** Explanation: Explanation/Reference: Explanation: The third party manages the DNS for Contoso.com. When a new server is added, the third party will update their DNS. With a .local domain, all queries for Contoso.com resources will go to the third party's DNS servers. With a .local domain, there is no need to maintain an internal copy of the Contoso.com DNS zone.

NEW QUESTION: 4 Your company has a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com. The company stores 2 TBs of data in SharePoint Online document libraries. The tenant has the labels shown in the following table. From the Azure portal, you activate unified labeling. For each of the following statements, select yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one

point.**Answer:** Explanation:
