Redistrution is enabled where necessary. Recently the implementation group has been using the test bed to do a 'proof-of-concept' on several implementations. This involved changing the configuration on one or more of the devices. You will be presented with a series of trouble tickets related to issues introduced

during these configurations.Note: Although trouble tickets have many similar fault indications, each ticket has its own issue and solution.Each ticket has 3 sub questions that need to be answered & topology remains same.Question-1 Fault is found on which device,Question-2 Fault condition is related to,Question-3 What exact problem is seen & what needs to be done for solutionSolutionSteps need to follow as below:-* Since the problem is raised that DSW1 will not become active router for HSRP group 10* we will check for the HSRP configuration...* From snapshot we see that the track command given needs to be changed under active VLAN10 router* Change Required: On DSW1, related to HSRP, under vlan 10 change the given track 1 command to instead use the track 10 command.
