(Choose two)**A.** The layer 2 and layer 3 roaming mechanisms currently in place**B.** The sensitivity of information sent over the wireless network**C.** The type of wired infrastructure supporting the wireless network**D.** The types of operating systems in use by WLAN end users**E.** The legal implications of an intruder stealing sensitive data**Answer: B,E**Explanation:If the data is highly sensitive, stronger authentication and encryption should be used to minimize the risk of exposure.
