Explanation: You can move a compartment to a different parent compartment within the same tenancy. When you move a compartment, all its contents (subcompartments and resources) are moved with it. Moving a compartment has implications for the contents. After you move a compartment to a new parent compartment, the access policies of the new parent take effect and the policies of the previous parent no longer apply. Before you move a compartment, ensure that: You are aware of the policies that govern access to the compartment in its current position. You are aware of the policies in the new parent compartment that will take effect when you move the compartment. In some cases, when moving nested compartments with policies that specify the hierarchy, the policies are automatically updated to ensure consistency.
