We can promise that quality first, service upmost, Don't need to worry about it!

**NEW QUESTION: 1** Which of the following statements regarding the positioning of SAP S/4HANA Cloud and SAP Ariba are true? Note: There are 3 correct answers to this question. **A.** SAP offers prebuilt integration for SAP Ariba and SAP S/4HANA Cloud. **B.** SAP Ariba provides network communication and strategic procurement. **C.** SAP S/4HANA Cloud covers operational procurement processes. **D.** SAP Ariba is required on top of SAP S/4HANA Cloud to do operational procurement. **E.** SAP Ariba provides operational procurement with tight integration to other business processes such as material requirements planning (MRP). **Answer: A,B,C**

**NEW QUESTION: 2** **A.** Option B **B.** Option A **C.** Option C **D.** Option D **Answer: C**

**NEW QUESTION: 3** When deploying clientless SSL VPN advanced application access, the administrator needs to collect information about the end-user system. Which three input parameters of an end-user system are important for the administrator to identify? (Choose three.) **A.** types of encryption that are supported on the end-user system **B.** the local privilege level of the remote user **C.** types of applications and application protocols that are supported **D.** types of operating systems that are supported on the end-user system **E.** types of wireless security that are applied to the end-user tunnel interface **F.** type of antivirus software that is supported on the end-user system **Answer: B,C,D** Explanation: When enabling port forwarding, the SSL VPN gateway will modify the hosts file on the PC of the remote user. Some software configurations and software security applications will detect this modification and prompt the remote user to select "Yes" to permit. To permit the modification, the remote user must have local administrative privileges. To securely access resources on a private network behind an SSL VPN gateway, the remote user of an SSL VPN service must have the following: \* "Thin Client" support used for TCP port-forwarding applications requires administrative privileges on the computer of the remote user. \* "Tunnel mode" for Cisco SSL VPN requires administrative privileges for initial installation of the full tunnel client. \* The remote user must have local administrative privileges to use thin client or full tunnel client features. Operating system support \* Microsoft Windows 2000, Windows XP, or Windows Vista \* Macintosh OS X 10.4.6 \* Linux (Redhat RHEL 3.0 +, FEDORA 5, or FEDORA 6) - SSL VPN-supported browser - The following browsers have been verified for SSL VPN. Other browsers might not fully support SSL VPN features.

**NEW QUESTION: 4** Which of the following is MOST important to the success of an information security program?  
**A.** Achievable goals and objectives  
**B.** Senior management sponsorship  
**C.** Security awareness training  
**D.** Adequate start-up budget and staffing  
**Answer: B**  
**Explanation:** Sufficient senior management support is the most important factor for the success of an information security program. Security awareness training, although important, is secondary. Achievable goals and objectives as well as having adequate budgeting and staffing are important factors, but they will not ensure success if senior management support is not present.
