**NEW QUESTION: 4**Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012. Server1 contains a virtual machine named VM1 that runs Windows Server 2012. You need to ensure that a user named User1 can install Windows features on VM1. The solution must minimize the number of permissions assigned to User1. To which group should you add User1?**A.** Power Users on VM1**B.** Server Operators on Server1**C.** Hyper-V Administrators on Server1**D.** Administrators on VM1**Answer: D**Explanation: In Windows Server 2012, the Server Manager console and Windows PowerShell cmdlets for Server Manager allow installation of roles and features to local or remote servers, or offline virtual hard disks (VHDs). You can install multiple roles and features on a single remote server or offline VHD in a single Add Roles and Features Wizard or Windows PowerShell session. You must be logged on to a server as an administrator to install or uninstall roles, role services, and features. If you are logged on to the local computer with an account that does not have administrator rights on your target server, right-click the target server in the Servers tile, and then click Manage As to provide an account that has administrator rights. The server on which you want to mount an offline VHD must be added to Server Manager, and you must have Administrator rights on that server.
