NEW QUESTION: 1 Under the internal ratings based approach for risk weighted assets, for which of the following parameters must each institution make internal estimates (as opposed to relying upon values determined by a national supervisor): **A.** Exposure at default **B.** Probability of default **C.** Loss given default **D.** Effective maturity **Answer: B**
Explanation: Regardless of the approach being followed by a bank (ie, whether foundation IRB or advanced IRB), it must make its own estimates for the probability of default. Banks following the foundation IRB approach may use values set by the supervisor for the other three parameters, though those following the advanced IRB approach may use their own estimates for all four inputs. (This is also the difference between advanced IRB and the foundation IRB approaches.) Therefore Choice 'a' is the correct answer. Also note the four difference elements that go as inputs to the internal ratings based approach in the choices provided.

NEW QUESTION: 4Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 and has the DHCP Server server role installed. Server1 has a scope named Scope1. A policy named Policy1 is configured for Scope1. Policy1 is configured to provide Hyper-V virtual machines a one-day lease. All other computers receive an eight-day lease. You implement an additional DHCP server named Server2 that runs Windows Server 2012. On Server1, you configure Scope1 for DHCP failover. You discover that virtual machines that receive IP addresses from Server2 have a lease duration of eight days. You need to ensure that when Server2 assigns IP addresses to the Hyper-V virtual machines, the lease duration is one day. The solution must ensure that other computers that receive IP addresses from Server2 have a lease duration of eight days. What should you do?
A. On Server2, create a new DHCP policy.
B. On Server1, right-click Scope1, and then click Replicate Scope.
C. On Server2, right-click Scope1, and then click Reconcile.
D. On Server1, delete Policy1, and then recreate the policy.
Answer: B
Explanation: Scope 1 has been set up for DHCP failover. Now we need to replicate it from Server1 to Server2.
