NEW QUESTION: 4 SQL > CONNECT scott/tiger@orcl
A. Option DB. Option BC. Option CD. Option AE. Option E
Answer: C
Explanation: Explanation Service registration enables the listener to determine whether a database service and its service handlers are available. A service handler is a dedicated server process or dispatcher that acts as a connection point to a database. During registration, the LREG process provides the listener with the instance name, database service names, and the type and addresses of service handlers. This information enables the listener to start a service handler when a client request arrives.
