NEW QUESTION: 1A. Option B B. Option D C. Option A D. Option C **Answer: B, C** Explanation:

NEW QUESTION: 2 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have Microsoft SQL Server on a Microsoft Azure virtual machine that has a database named DB1. You discover that DB1 experiences WRITE_LOG waits that are longer than 50 ms. You need to reduce the WRITE_LOG wait time. Solution: Add additional data files to DB1. Does this meet the goal? **A. No B. Yes** **Answer: A** Explanation: Explanation In SQL Server, if we have a transactional based system and find a high WRITELOG wait type this is a performance bottleneck and can cause the transaction log file to grow rapidly and frequently. It is being recommended to SQL server users that they must archive the log files on a separate disk for getting better performance.

NEW QUESTION: 3 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are designing an Azure solution for a company that has four departments. Each department will deploy several Azure app services and Azure SQL databases. You need to recommend a solution to report the costs for each department to deploy the app services and the databases. The solution must provide a consolidated view for cost reporting. Solution: Create a separate resource group for each department. Place the resources for each department in its respective resource group. Does this meet the goal? **A. No B. Yes** **Answer: A** Explanation: Instead create a resources group for each resource type. Assign tags to each resource group. Note: Tags enable you to retrieve related resources from different resource groups. This approach is helpful when
