NEW QUESTION: 4 What is an advantage of a POWER8 system compared to an x86 solution?
A. More cores per socket
B. Greater memory bandwidth
C. Lower PVU cost
D. Supports PCIe Gen
Answer: A
Explanation: Systems that are designed with fewer components and interconnects have fewer opportunities to fail. Simple design choices, such as integrating processor cores on a single POWER chip, can reduce the opportunity for system failures. The POWER8 chip has more cores per processor module, and the I/O Hub Controller function is integrated in the

processor module, which generates a PCIe BUS directly from the processor module. Parts selection also plays a critical role in overall system reliability.
