**NEW QUESTION: 2** Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. When you are finished performing all the tasks, click the 'Next' button. Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam. Overview The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able

to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab you may start the lab by clicking the Next button. You plan to create 100 Azure virtual machines on each of the following three virtual networks: \* VNET1005a \* VNET1005b \* VNET1005c All the network traffic between the three virtual networks will be routed through VNET1005a. You need to create the virtual networks, and then to ensure that all the Azure virtual machines can connect to other virtual machines by using their private IP address. The solution must require any virtual network gateways and must minimize costs.

What should you do from the Azure portal before you configure IP routing? **Answer:**

Explanation: See solution below. Explanation Step 1: Click Create a resource in the portal. Step 2: Enter Virtual network in the Search the Marketplace box at the top of the New pane that appears. Click Virtual network when it appears in the search results. Step 3: Select Classic in the Select a deployment model box in the Virtual Network pane that appears, then click Create. Step 4: Enter the following values on the Create virtual network (classic) pane and then click Create: Name: VNET1005a Address space: 10.0.0.0/16 Subnet name: subnet0 Resource group: Create new Subnet address range: 10.0.0.0/24 Subscription and location: Select your subscription and location. Step 5: Repeat steps 3-5 for VNET1005b (10.1.0.0/16, 10.1.0.0/24), and for VNET1005c (10.2.0.0/16, 10.2.0.0/24). References:
