NEW QUESTION: 1What solution would you recommend to a customer that wants to implement ePrinting, but is concerned about the risk of documents left in printer output trays?
A. HP Access Control Secure Pull Printing**B.** HP Imaging and Printing Security Center (IPSC)**C.** HP Trust Circles**D.** HP ProtectTools Security Software
Answer: A

NEW QUESTION: 2Refer to the exhibit.Which statement is true about the downward bit?
A. It informs the PE router that the LSA metric has been recently decreased to 1 and that partial SPF calculation cannot be delayed.**B.** It forces the CE router to install the LSA with the downward bit set into its routing table as a discard route.**C.** It forces the CE router to use a backup link instead of sending traffic via MPLS VPN.**D.** It informs the PE router that the LSA was already redistributed into BGP by another PE router and that the LSA must not be redistributed into BGP again.
Answer: D
Explanation:From RFC 4577, specifically section 4.2.5.1 When a type 3 LSA is sent from a PE router to a CE router, the DN bit [OSPF-DN] in the LSA Options field MUST be set. This is used to ensure that if any CE router sends this type 3 LSA to a PE router, the PE router will not redistribute it further. When a PE router needs to distribute to a CE router a route that comes from a site outside the latter's OSPF domain, the PE router presents itself as an ASBR (Autonomous System Border Router), and distributes the route in a type 5 LSA. The DN bit [OSPF-DN] MUST be set in these LSAs to ensure that they will be ignored by any other PE routers that receive them.

NEW QUESTION: 3Where do you verify that UserDirectory is enabled?
A. Verify that Global Properties > Authentication > Use UserDirectory (LDAP) for SecurityGateways is checked
B. Verify that Security Gateway > General Properties > Authentication > Use UserDirectory(LDAP) for Security Gateways is checked
C. Verify that Global Properties > UserDirectory (LDAP) > Use UserDirectory (LDAP) forSecurity Gateways is checked
D. Verify that Security Gateway > General Properties > UserDirectory (LDAP) > UseUserDirectory (LDAP) for Security Gateways is checked
Answer: C
