NEW QUESTION: 3 Your client wants to send a notification email to the assigned sales representative of the contact submitting the form. Contacts have one of 2,000 possible sales representatives' names assigned to them within the Salesperson contact field. How do you configure this? **A.** There is no functionality that currently exists in Eloqua to configure this solution, and your client would require custom coding. **B.** Send form submitter to a Campaign Canvas and send an email using a signature rule, where Salesperson is the key identifier. **C.** Send form submitter to a custom object that has a data services step to direct the newly created record to a Program Canvas to send emails. **D.** Create a picklist of sales representatives' email addresses and the corresponding Sales Rep contact field, and use the "Send Notification Email" processing step. **Answer: D**

NEW QUESTION: 4 A company has client computers that run Windows 7 Enterprise. The company also has a file server running Windows Server 2008 R2 that is configured to use BranchCache. The branch office with the client computers has a slow network connection to the office with the file server. Users complain of poor performance when connecting to the file server from their client computers. You need to verify that the client computers are configured to be BranchCache clients. Which two choices should you use to achieve this goal? (Each correct answer presents a complete solution. Choose two.) **A.** Local Users and Groups **B.** the icacsl

command **C.** Device Manager **D.** share permissions **E.** the Group Policy management console **F.** the netsh command **G.** the User Account Control Settings Control Panel window **H.** the folder Properties window **I.** the Services management console **Answer: E, F**
Explanation: Explanation/Reference: Explanation: To enable BranchCache on Windows 7 client computers using Group Policy, you must first create a Group Policy object (GPO) that will carry the BranchCache configuration. After creating the GPO, you configure the setting that enables BranchCache and choose whether BranchCache will operate in Distributed Cache mode or Hosted Cache mode. To create a GPO, enable BranchCache, and select the cache mode Click Start, point to Administrative Tools, and click Group Policy Management Console. Client configuration using netsh When configuring client computers, you can enable BranchCache and choose between Distributed Cache mode and Hosted Cache mode with a single netsh command.
