NEW QUESTION: 1You have a Dynamics CRM organization that is configured to use Microsoft SharePoint server-based integration for document management. You need to identify which two components that can be integrated with CRM require SharePoint server-based integration. Which two components should you identify? Each correct answer presents a complete solution.
A. Microsoft Yammer **B.** Microsoft OneDrive for Business **B.** Microsoft Dynamics Marketing **C.** Microsoft Office Graph **D.** Microsoft Social Engagement **Answer: D**

NEW QUESTION: 2You have a Microsoft 365 subscription that contains the users shown in the following table. You have the named locations shown in the following table. You create a conditional access policy that has the following configurations: Users and groups: Include: Group1 Exclude: Group2 Cloud apps: Include all cloud apps Conditions: Include: Any location Exclude: Montreal Access control: Grant access, Require multi-factor authentication User1 is on the multi-factor authentication (MFA) blocked users list. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation: The Blocked User list is used to block specific users from being able to receive Multi-Factor Authentication requests. Any authentication attempts for blocked users are automatically denied. Users remain blocked for 90 days from the time that they are blocked. Box 1: Yes 133.107.10.20 is in the Montreal named location. The conditional access policy excludes Montreal so the policy does not apply. Therefore, User1 can access Microsoft Office 365. Box 2: No 193.77.10.15 is in the Toronto named location. The conditional access policy applies to Group1 which User1 is a member of and all locations except for Montreal. Therefore, the conditional access policy applies in this case. The policy requires MFA but User1 is on the MFA blocked list so he is unable to use MF Box 3: Yes User2 is in Group1 and Group2. The conditional access policy applies to Group1 but excludes Group2. Therefore, the conditional access policy does not apply in this case so User2 can access Microsoft Office 365. Reference:

Overview Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide. Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States.

Existing Environment Active Directory Environment The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication. Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts. All users authenticate to on-premises applications by signing in to their device by using a UPN format of [\[email# protected\]](#). Fabrikam does NOT plan to implement identity federation.

Network Infrastructure Each office has a high-speed connection to the Internet. Each office contains two domain controllers. All domain controllers are configured as a DNS server. The public zone for fabrikam.com is managed by an external DNS server. All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed. All shared company documents are stored on a Microsoft SharePoint Server farm.

Requirements Planned Changes Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription. Fabrikam plans to implement two pilot projects: Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365. Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users. Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

Technical Requirements Fabrikam identifies the following technical requirements: All users must be able to exchange email messages successfully during Project1 by using their current email address. Users must be able to authenticate to cloud services if Active Directory becomes unavailable. A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center. Microsoft Office 365 ProPlus applications must be installed from a network share only. Disruptions to email address must be minimized.

Application Requirements Fabrikam identifies the following application requirements: An on-premises web application named App1 must allow users to complete their expense reports online. The installation of feature updates for Office 365 ProPlus must be minimized.

Security Requirements Fabrikam identifies the following security requirements: After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN. The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically. After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically. The principle of least privilege must be used.
