**NEW QUESTION: 1**How can a user make changes to a policy that is in review?**A.** A user in the Policy Reviewer role must move the policy to a different folder.**B.** A user in the Policy Reviewer role must request changes to the policy.**C.** A user in the Policy Reviewer role must unpublish the policy.**D.** A user in the Policy Approver role must change the policy version number.**Answer: B**

**NEW QUESTION: 2**A user is trying to create a list of IAM users with the AWS console. When the IAM users are created which of the below mentioned credentials will be enabled by default for the user?**A.** IAM passwords**B.** Nothing. Everything is disabled by default**C.** IAM X.509 certificates**D.** IAM access key and secret access key**Answer: B****Explanation:**ExplanationNewly created IAM users have no password and no access key (access key ID and secret access key). If the user needs to administer your AWS resources using the AWS Management Console, you can create a password for the user. If the user needs to interact with AWS programmatically (using the command line interface (CLI), the AWS SDK, or service-specific APIs), you can create an access key for that user. The credentials you create for users are what they use to uniquely identify themselves to AWS.References:
