NEW QUESTION: 2Exhibit: A company is using HP Network Protector SDN Application with the default RepDV filters. The rest of the configuration is at default. A network administrator wants to determine whether the HP Network Protector application will deny access to a web site.The administrator searches for the domain name and receives the result shown in the exhibit. What can the administrator determine?**A.** The application will not block access to the web site at any time, but it will log attempts to access it.**B.** The application will block access to the web site during business hours but not at other times.**C.** The application will not block access to the web site at any time or log any messages.**D.** The application will block access to the web site and log attempts to access it.**Answer: A**

NEW QUESTION: 3 Scenario: A Citrix Architect needs to design a new XenApp and XenDesktop environment. The architect has identified the access requirements listed in the Exhibit. Click the Exhibit button to view the requirements. A single store has already been configured with the following settings, every other setting has been kept as a default. Username/Password authentication No resource filtering NetScaler Gateway is configured for authentication No IIS redirection Deploy Receiver 4.10 installer The architect needs to evaluate whether the current store, which cannot be changed, meets the requirements of the user groups and needs to determine how many additional stores are required. How many additional StoreFront stores does the architect need to support the requirements shown in the Exhibit? **A. 0 B. 1 C. 2 D. 3 E. 4**

Answer: D

NEW QUESTION: 4 Your company has a private cloud that is managed by using a System Center 2012 infrastructure. An administrator installs a new tape drive on a server that has Data Protection Manager (DPM) installed. You discover that the tape drive is unavailable from the DPM Administrator console. You verify that the tape drive is installed correctly on the DPM server. You need to ensure that the tape drive is available from the DPM Administrator console. What should you do from the DPM Administrator console? **A. From the Disks tab, click Add. B. From the Libraries view, click Rescan. C. From the Agents view, click Install. D. From the Protection view, click Tape. Answer: B** Explanation: To configure tape libraries In DPM Administrator Console, on the navigation bar click Management, and then click the Libraries tab. In the Actions pane, click Rescan. The Rescan operation might take several minutes to complete. DPM will add any library jobs to the queue that began during the Rescan operation. If a library job is already in progress when the Rescan operation begins, the Rescan operation will fail. Configuring Tape Libraries <http://technet.microsoft.com/en-us/library/ff399665.aspx>
