If you have any questions at purchasing process or using about C_S4CS_2408 valid study material, our customer service agent will answer you patiently at any time.

The qualified practice materials and interesting **C_S4CS_2408 Valid Study Guide** design give our candidates confidence as well as eliminate tension of our customers.

NEW QUESTION: 1You need to have a requirement to store objects in an S3 bucket with a key that is automatically managed and rotated. Which of the following can be used for this purpose? Please select:
A. AWS KMS
B. AWS S3 Server side encryption
C. AWS Cloud HSM
D. AWS Customer Keys
Answer: B
Explanation:The AWS Documentation mentions the following Server-side encryption protects data at rest. Server-side encryption with Amazon S3-managed encryption keys (SSE-S3) uses strong multi-factor encryption. Amazon S3 encrypts each object with a unique key. As an additional safeguard, it encrypts the key itself with a master key that it rotates regularly. Amazon S3 server-side encryption uses one of the strongest block ciphers available, 256-bit Advanced Encryption Standard (AES-256), to encrypt your data. All other options are invalid since here you need to ensure the keys are manually rotated since you manage the entire key set Using AWS S3 Server side encryption, AWS will manage the rotation of keys automatically. For more information on Server side encryption, please visit the following URL: <https://docs.aws.amazon.com/AmazonS3/latest/dev/UsingServerSideEncryption.html>
The correct answer is: AWS S3 Server side encryption
Submit your Feedback/Queries to our Experts

NEW QUESTION: 2What should you use to check if a checkbox is selected or cleared? Options are:
A. Click activity
B. Get Attribute activity
C. A Trigger activity
D. Check activity
Answer: B

NEW QUESTION: 3A team's goal is to improve information flow in a payroll function. They make thirty-three Post-It@ notes, each listing an issue for further investigation. After some discussion, they group them into four categories: mandated record keeping, privacy concerns, insurance concerns and transfer concerns. This grouping process is best described by which approach to problem solving?
A. Inter-relationship digraph
B. Prioritization matrix
C. Activity network diagram
D. Process decision program chart
E. Affinity diagram
F. Matrix diagram
G. Tree diagram
Answer: E
