They are time-tested E_S4CPE_2023 learning materials, so they are classic, If you boost professional knowledge capabilities in some area you are bound to create a lot of values and can get a good job with high income.

NEW QUESTION: 1Your network contains an Active Directory forest named contoso.com. The domain contains three servers. The servers are configured as shown in the following table. You need to identify which server role must be deployed to the network to support the planned implementation. Which role should you identify?
A. Windows Deployment Services
B. Active Directory Rights Management Services
C. Volume Activation Services
D. Network Policy and Access Services
Answer: A
Explanation: Explanation/Reference: Explanation: Windows Deployment Services (WDS) is a server role that enables you to remotely deploy Windows operating systems. You can use it to set up new computers by using a network-based installation. This means that you do not have to install each operating system directly from a CD, USB drive or DVD. To use Windows Deployment Services, you should have a working knowledge of common desktop deployment technologies and networking components, including Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), and Active Directory Domain Services (AD DS). It is also helpful to understand the Preboot execution Environment (also known as Pre-Execution Environment).

NEW QUESTION: 2Which component of the Dell Storage Manager (DSM) suite's only purpose is to perform disaster recovery if the primary data collector is no longer available?
A. Dell Storage Manager Remote Data Collector
B. Dell Storage Manager Client
C. Dell Storage Manager Server Agent
D. Dell Application Protection Manager
Answer: D

NEW QUESTION: 3Where do you indicate that the useful life of the asset sub-number is identical to the useful life of the main asset?
Response:
