An Easy Access to your SAP Certified Application Associate Certification with C-S4PPM-2021 Exam Questions.

NEW QUESTION: 1Which of the following is an example of a spear phishing attack?**A.** Targeting an executive with an SMS attack**B.** Targeting a specific team with an email attack**C.** Targeting an organization with a watering hole attack**D.** Targeting random users with a USB key drop

Answer: B

NEW QUESTION: 2A company is developing a new stateless web service with low memory requirements. The service needs to scale based on demand.What is the MOST cost-effective solution?**A.** Deploy the application onto a container with an Amazon ECS EC2 launch type**B.** Deploy the application onto AWS Lambda with access through Amazon API Gateway**C.** Deploy the application onto AWS Elastic Beanstalk**D.** Deploy the application onto an Amazon EC2 Spot Fleet**Answer: A**

NEW QUESTION: 3Microsoft 365 Enterpriseサブスクリプションがあります。

次の展示に示すように、パスワードポリシーを作成します。

ドロップダウンメニューを使用して、図に示されている情報に基づいて各ステートメントを完成させる回答の選択肢を選択します。注：それぞれの正しい選択には1ポイントの価値があります。

Answer: Explanation:ExplanationBy default, smart lockout locks the account from sign-in attempts for one minute after 10 failed attempts. In this question, the lockout threshold is 5 failed attempts. The account locks again after each subsequent failed sign-in attempt, for one

minute at first and longer in subsequent attempts. Password evaluation goes through several steps including normalization and Substring matching which is used on the normalized password to check for the user's first and last name as well as the tenant name. The next step is to identify all instances of banned passwords in the user's normalized new password. Then: * Each banned password that is found in a user's password is given one point. * Each remaining unique character is given one point. * A password must be at least five (5) points for it to be accepted. Conto\$01Pa\$\$word contains two banned passwords and no remaining unique characters so is given a score of 2 points. This is less than the required 5 points so will be rejected. Pa\$\$w0rd contains a banned password and no remaining unique characters so is given a score of 1 point. This is less than the required 5 points so will be rejected. AzureAD!!111 contains a banned password (AzureAD!!) and has three remaining characters. However, the remaining characters are all the same (they're all 1s) so that is only one unique character. So that password will be given a score of 2. One for the banned password and 1 for the unique character. This is less than the required 5 points so will be rejected. Password11 does not contain a banned password. Password11 contains 10 characters. However, there are two 's' and two '1' so there are 8 unique characters. Therefore, the password will be given a score of 8 points. This is more than the required 5 points so the password will be accepted.
